Which Chamber is Right for Me?

One size does not fit all when it comes to chambers.
Use the chart below to find the most appropriate chamber.

Small Mask	Medium Mask	Youth Mouthpiece	Mouthpiece	Small Mask	Large Mask
CHILD			ADULT		

Tip: Use the *Flow-Vu** Inhalation Indicator

The ***Flow-Vu**** Indicator moves with inspiration and helps to provide assurance of correct use for medication delivery.

- Helps coordinate actuation with inhalation
- Ensures proper seal
- Enables counting of breaths

Chamber Care and Replacement

3 reasons to replace

1. Chambers should be replaced every 12 months for optimum medication delivery. ***AeroChamber Plus**** ***Flow-Vu**** chamber undergoes lifecycle testing for one year of regular use.
2. Transition to a new size.
   - Ensure children under 5 years of age are using the correct mask size
   - Children should transition to a mouthpiece around 5 years of age
3. It is important to follow recommended cleaning guidelines. Not doing this can result in medication build-up in the valves which may impair performance.

REPLACE 12 MONTHS

For optimal performance chambers should be replaced every 12 months
